

SHADE FILM
Article No. SF1051

DESCRIPTION

SiGr02 film offers very good heat and glare protection. With this film a high saving in energy costs for cooling is achieved. To ensure the stability of the film as well as the entire sun protection system, the film is embossed and pleated as standard, which also gives it excellent visual elegance. In addition the SiGr02FR is flame retardant (B1) according to DIN 4102-01:1998-05.

FEATURES

Application

INTENDED USE

The SiGr02 film is a true all-rounder for all applications. It is often used in office buildings with VDU workstations and in commercial buildings in general. Due to the flame retardancy, the SiGr02FR is an indispensable part of every film portfolio.
